DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 5/10/05 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1,3,21 and 23 are rejected under 35 U.S.C. 102(e) as being anticipated by Braun et al. (6,511,497). Braun et al. disclose a filter system comprising a guide wire (14), a filter device (11) having an interior and an exterior, a compressing element (161) and a delivery element (16).

Allowable Subject Matter

4. Claims 28-35 are allowed. Claims 2,4,5,7-10,13,14,22, 24,25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art fails to disclose or suggest a compressing element located in the interior of the filter device hand having an engageable element and an engaging

element. The prior art fails to disclose or suggest a stop member as claimed in combination with other limitations of the claims.
